

2018 Batch

Ronak K Vernekar
2JR18CV015

The college is well equipped with good infrastructure, classroom, and lab. The faculty at the college have been incredibly friendly, supportive, and approachable. They always took the time to guide us, making the learning experience enjoyable and enriching. The faculty supported us not only in academics but also in personal growth, teaching valuable life skills and real-world knowledge beyond the classroom.

The college has prepared me for my future aspirations by offering a solid academic foundation and fostering a supportive environment. The guidance from faculty and networking opportunities have been essential for my career development.

The faculty specifically helped us understand what companies expect from employees and guided us in finding work that aligns with our interests/purpose.

2019 Batch

Nikita Koparde
2JR19CV014

Our college atmosphere was not a typical college atmosphere, we literally felt it as our second home. Our faculties played really various role in my life they were not only mentoring to me, I felt them as my parents. They not only helped me in the academics but also gave me the full opportunity to lead various technical events, which not only helped me to gain the technical knowledge but also taught me a real time coordination with various departments.

As I explained above it taught me a real time coordination and its helping me in my current job of a coordinator. My college and faculties shaped us so well that I can proudly say that all Jainites can withstand better in all situation though its being in our personal life or professional life, we can survive and win. My college gave me one important thing i.e. the self-confidence, with this I can handle the worse situation in my life.

2020 Batch

Spurti Raju
2JR21CV405

The college is well equipped with good infrastructure, classroom, and lab. The teaching and non-teaching staff members are good. The teacher engaged with us well and taught the theory and practical information in an effective way. Mentorship at the college is very good and also helped for personal growth.

The three years of college journey have been great, the collage held events, and many functions were also celebrated during the academic year. Over all the three years of experience was good with teachers and with my friends. Our faculties always motivated and helped us to gain practical knowledge and encouraged us to participate in different technical and non-technical activities.

JCER offers a blend of theoretical knowledge and practical application, ensuring students are well-prepared. The college is equipped with modern laboratories and facilities to enhance learning. The teaching and non-teaching staff members are good and supportive. The teacher engaged with us well and demonstrated us with deep understanding of the subject matter. They taught the theory and practical information in an effective way.

My journey in JCER has been great. The collage held events, these events have played a significant role in enhancing my overall college experience and many functions were also celebrated during the academic year. JCER helps us to focus on specific skills which helps us to focus on our career goal. Over all my experience was good with teachers and with my friends.
